

Spot Leukaemia

Know the symptoms

Feeling exhausted or worn out

Bruising easily

Unusual bleeding

Frequent or long-lasting infections

Fever for no obvious reason

Drenching night-time sweats

Feeling breathless

Joint or bone pain

Rash

Looking pale

Swollen lymph nodes (glands)

Tummy pain, bloating or fullness

Losing weight without trying to

Many illnesses can cause all these symptoms. Most people who have them do **not** have leukaemia.

If you're worried about any of these symptoms, contact your GP. Tell them you're concerned about leukaemia and ask about a blood test.
